As VP of Digital Transformation, Rusty manages Surgere's partnership with Microsoft.

Rusty supports supply chain solutions for clients in the automobile and aerospace industries. He successfully built relationships with leaders at Microsoft, making it possible for Surgere to become 1 of 26 selected IoT Solution Providers.

Rusty has been with Surgere since 2018. With deep expertise in supply chain and operations management he has leadership experience in digital transformation from past roles.

Previously, he was the North American director of materials at Electrolux where he managed the supply chain and the organization's digital transformation efforts. He successfully managed 45,000 appliance parts each day. Before Electrolux, Rusty was the senior materials manager at Gulfstream Aerospace for eight years. Rusty is currently a member of the Institute of Supply Chain Management.

Surgere is an industry pioneer leveraging IoT technology to revolutionize the supply chain. Surgere knows the challenges and has engineered innovative secure technology, patented software, and certified hardware to consistently deliver 99.9% data fidelity. Surgere expands visibility into the physical supply chain supporting many of the world's leading industries.
